APPLIED SCIENCES

International project week @UCLL

The international student project week is a short-term blended program combining a virtual collaboration and a five-day physical exchange. It brings together students from different European universities or university colleges offering bachelor programs in Biomedical Laboratory Sciences, Lab Science, or Biotechnology.

Objectives:

- Develop research skills
- Foster teamwork and intercultural competence
- Enhance data analysis and presentation skills
- Improve language proficiency

Outcomes:

- Collaborative research project
- Final presentation in English
- 3 ECTS credits

Language Requirement: English (A2 level minimum)
