## Outline of the programme

The main target of this week is to let you work in mixed international groups on a subject in finance. It makes you think and communicate in another language. In this way you broaden your practical knowledge of languages and culture.

We form groups of people with different nationalities. At the end of the week the groups give a presentation within their market of the work they have achieved.

We play a banking simulation in 4 rounds. Some guest lectures are organized. Social and cultural activities are organized to allow you to meet your fellow students from other countries.
