International Business Week - Finance

6th edition

Banking simulation

Additional information for coaches

Leuven

5 March - 9 March 2018

Outline of the programme

The main target of this week is to let students work in mixed international groups on a subject that interests them, which makes them think and communicate in another language. In this way students with as main subject Business Management broaden their practical knowledge of languages and culture.

Students participate in a banking simulation. The students are split up into different groups. A set of 4 - 5 groups compete with each other within the same market. Each bank has to define its objectives and make decisions to reach those objectives. At certain regular points in time the coach gives the students an update of the market situation so that the students are able to make decisions for the following period.

We form groups of people with different nationalities. The more nationalities involved, the more interesting it will be for the students.

At the end of the week the groups give a presentation within their market of the work they have achieved. Students are evaluated on their results and presentation skills.

Crew

The crew consist out of three students of UC Leuven - Limburg. They will contact your students to give them information prior to arrival: e.g. information about the youth hostel, train schedules, bus services, dress code for dinner and comfortable clothing for the sports activity …

Contact will be taken after formal registration by the foreign students.

The guest students should be stimulated to reply to the mails of the crew.
